

RMGS CURRICULUM MAP: ECONOMICS DEPARTMENT

As a department we aim to develop student appreciation of Economics as a discipline and focus on sharpening their skills of analysis and evaluation in the subject by building up their knowledge, skills of application and confidence in all areas. The GCSE and A level courses give students the opportunity to explore real life economic issues and how to identify problems and appreciate the complexities involved in the decision making of solutions. The courses are intended to look at the economic systems objectively and appreciate that all students are part of the system as consumers, workers and the local community in all aspects of their lives. We believe it is essential to the teaching and learning within the department that students are developing such a philosophy in a mature and motivated manner. As well as ensuring they are fully equipped and confident for the world of work through looking at numerous career paths and developing the soft skills required in far reaching careers.
